

EEG HD485 HD/SD CLOSED CAPTION ENCODER FOR POST PRODUCTION ADDS ANC-VITC TIME CODE CAPABILITY

Free Firmware Update for Compact, Full-Featured Post Production Closed Captioning System Now Provides Broader Compatibility, Increased Flexibility/Ease of Setup

FARMINGDALE, NY: EEG (www.eegent.com), the industry leader in HD workflow and closed captioning, has announced a significant new upgrade to the HD485 HD/SD closed caption encoder. Available as a no-charge firmware update, the HD485 now accepts ANC-VITC time code.

The new feature expands the capabilities and connectivity options of the HD485, which will continue to accept LTC time code, as before. With this upgrade, post production facilities now enjoy broader compatibility from EEG's HD485, with increased ease of integration into their technical plant.

EEG's HD485 incorporates HD and SD video paths, ANC-VITC and LTC time code readers, and a network-ready PC with software, all in a 1RU box, for extreme performance in a compact package. Specifically designed for the EEG CCPlay™ software suite, the HD485 offers a seamless and intuitive workflow for file-based captioning jobs.

###

About EEG:

EEG offers the most complete line of Closed Captioning, XDS (V-Chip) and ancillary data encoders, decoders and software for the broadcast, post production, and educational industries. The company's 25+ years of experience in the fields of Closed Captioning and ancillary data distribution provides the most stable equipment base available. In addition, EEG's continuing participation in various industry working groups allows the company to incorporate and maintain the latest advances in Line 21 technology throughout its product line. EEG products are fully compliant with EIA-608 for analog and digital NTSC video and EIA-708 for HDTV video standards, and are designed and manufactured in the United States of America.
