

EEG PROVIDES USERS OF THE ICAP REALTIME CAPTIONING SYSTEM WITH NEXT-GENERATION FEATURES

Latest Update to IP-based CC Platform Includes PC-based Monitoring Suite, Web-Based Remote Administration Tools, and iCap Textcast for Public Events

NAB SHOW 2010, BOOTH # SL9120: EEG (www.eegent.com), the industry leader in HD workflow and closed captioning, will introduce a set of sophisticated new features for its **iCap Realtime Captioning System**.

Since its introduction, **iCap** has been allowing broadcasters to transcend the traditional limitations of previous analog-based closed captioning platforms, tapping the power of IP connections, cryptographic security, and a robust server-based system. At NAB Show 2010, EEG will unveil a number of next-generation features for iCap, including:

- PC-based Monitoring Suite for multi-encoder broadcast networks
- revamped web-based Remote Administration tools
- iCap Textcast, an integrated mobile application for providing accessibility compliance at public events including arenas and conferences.

“Adoption of iCap continues to rise at broadcast networks nationwide,” notes Philip McLaughlin, President of EEG. “This drives customer feedback and points the way for additional features. These new tools reinforce iCap’s standing as the most advanced realtime captioning system available.”

The complete range of EEG hardware and software will be at NAB Show 2010. On display will be its full line of industry-leading solutions for HDTV captioning, HD VANC data insertion and monitoring, Caption Legalizers™ and data bridges, network alert systems, and CGMS-A and V-chip monitors.

About EEG:

EEG offers the most complete line of Closed Captioning, XDS (V-Chip) and ancillary data encoders, decoders and software for the broadcast, post production, and educational industries. The company's 25+ years of experience in the fields of Closed Captioning and ancillary data distribution provides the most stable equipment base available. In addition, EEG's continuing participation in various industry working groups allows the company to incorporate and maintain the latest advances in Line 21 technology throughout its product line. EEG products are fully compliant with EIA-608 for analog and digital NTSC video and EIA-708 for HDTV video standards, and are designed and manufactured in the United States of America.
