

EEG INTRODUCES VOICE CAPTIONING FOR ICAP IP-BASED REALTIME CAPTIONING SYSTEM

*New Voice Recognition Feature Provides Cost-Effective
Emergency Captioning Compliance Solution for TV Stations*

FARMINGDALE, NY: EEG (www.eegent.com), the pacesetter for closed captioning solutions, has further enhanced its iCap IP-based Realtime Captioning System with a new Voice Captioning feature. iCap Voice Captioning (iCap VC) provides small market TV stations with a highly streamlined and cost-effective solution for emergency captioning compliance.

With iCap VC caption entry is accomplished via a voice recognition system that integrates smoothly with iCap and the EEG HD480 Smart Encoder V. Using iCap VC, a trained staffer monitors the live on-air audio on headphones, then respeaks it via microphone into the captioning system. Users can also supplement voice captioning through iCap VC with timed captioning from a pre-prepared script or any text file.

In this way, small market stations using iCap VC will be equipped for accurate emergency captioning self-sufficiency.

“With its efficient workflow, iCap VC speeds the way toward getting critical emergency information to viewers who depend on captioning,” says Philip McLaughlin, President of EEG. “It provides small market stations with a cost-effective path for meeting this important mandate.”

###

About EEG:

EEG offers the most complete line of Closed Captioning, XDS (V-Chip) and ancillary data encoders, decoders and software for the broadcast, post production, and educational industries. The company's 25+ years of experience in the fields of Closed Captioning and ancillary data distribution provides the most stable equipment base available. In addition, EEG's continuing participation in various industry working groups allows the company to incorporate and maintain the latest advances in Line 21 technology throughout its product line. EEG products are fully compliant with EIA-608 for analog and digital NTSC video and EIA-708 for HDTV video standards, and are designed and manufactured in the United States of America.
